

Monthly Website Templates

Product Usage Guidelines, CodegridPRO

Starter Framework

This template is offered as part of the CodegridPRO membership—a monthly resource designed to support developers and designers with professionally structured, production-ready foundations. It is intended to streamline the creative process, reinforce advanced implementation techniques, and accelerate project development without the need to start from scratch. The template serves as a boilerplate and is intended to be extended, customized, and adapted to meet specific project requirements. It is not intended to be used as a final product without modification.

Educational Reference & Originality

This template is provided solely for educational, prototyping, and internal reference purposes. It draws conceptual and structural inspiration from award-winning websites to help users study how high-quality design systems and user experiences can be developed and implemented in practice. It offers a hands-on opportunity to explore layout structure, component behaviour, interaction flow, and front-end design architecture.

While inspired by existing digital work, the template does not reuse or replicate any copyrighted materials. Care has been taken to ensure that no protected content—such as proprietary code, original copy, or licensed brand assets—is included. Deliberate modifications have been made to distinguish it from any specific source.

Users are expected to build upon this foundation by introducing their own visual identity, content, and interaction logic. This not only reinforces full creative ownership but also demonstrates professional integrity and respect for original creators. To avoid any risk of copyright infringement, substantial and meaningful customization is required before the template is used in any public-facing or commercial setting.

Assets & Licensing

This template includes premium assets—such as high-quality images (from Unsplash+ and Lummi PRO) and licensed typefaces—curated to demonstrate the intended visual direction and layout behaviour. These assets have been licensed for inclusion in this template package for educational and reference use only. If any of them are to be used in personal or commercial projects, users must secure the appropriate licenses independently or replace them with alternatives for which they hold valid usage rights.
